PROFESSIONAL PROFILE

MBA candidate at Aston Business School with four years delivering enterprise technology for UK insurance and banking clients. Led 15 engineers through a legacy platform migration to go-live with zero UAT defects, and built the automation that cut development time 30%. Targeting technical project management, delivery and technology consulting.

EDUCATION

MBA (Master of Business Administration) | Aston University | Birmingham, UK | Sep 2026 – Sep 2027 (Expected)

B.Tech, Electronics & Communication Engineering | India | 2024

PROFESSIONAL EXPERIENCE

Programmer Analyst – Delivery & Resourcing | Cognizant | India (UK/AU client – Chubb) *Jul 2025 – Sep 2026*

- Led the migration of a major UK insurer's legacy customer communications from Xpression to Quadient — rebuilding forms as reusable blocks and templates and deploying changesets across TEST, UAT and PROD — with zero UAT defects and ~30% higher development efficiency.
- Built a PDPX-to-JLD converter that removed the manual rebuild step — ~30% less development time and ~30% faster form delivery — and introduced generative-AI tooling that lifted AI-assisted delivery ~40%.
- Built Base Templates (BT) and Style Masters to standardise document design, ensuring brand consistency and reducing rework.
- Led a 15-member team across both Agile and Waterfall delivery — planning and tracking day-to-day work on JIRA and ServiceNow boards and reporting status to senior stakeholders — and trained all 15 on Quadient, building in-house capability and cutting reliance on external hiring by ~40%.
- Ran end-to-end resourcing and hiring across technology competencies — recruiting and onboarding 30–40 professionals via Service Order placement, and acting as the named contact from offer through to day one.
- Recognised with the Cognizant Cheers Award for delivery excellence and clean deployments.

Quadient Analyst & PMO (Junior PMO) | Paragon Customer Communications (UK) | India *Feb 2025 – Jul 2025*

- Analysed business requirements and built templates in Interactive and Designer for multiple UK clients across insurance, banking and other domains, generating multi-format outputs (PDF/JSON) and maintaining style masters.
- Coordinated 10+ production releases a day with a zero-failed-deployment record, and ran production support across environments — monitoring services and resolving failures to sustain service levels.
- Worked as PMO for PSAS India, owning governance, RAID logs, planning and status reporting to enable timely go/no-go decisions.

Associate Consultant – CCM Developer & Support | Atos Syntel | India (Client: Paragon, UK) *Sep 2022 – Feb 2025*

- Debugged Quadient support tickets in JIRA using Scaler job IDs, monitored services across environments and resubmitted failed jobs from checkpoints after RabbitMQ or network failures — minimising downtime and sustaining SLAs.
- Patched and upgraded Quadient ICM and Designer on servers, keeping the platform stable, secure and current.
- Coordinated controlled releases at 10+ changesets a day across TEST-UAT and TEST-PROD, approving and assigning tasks — maintaining a zero-failed-deployment record with full audit compliance.
- Delivered consistently, earning a direct in-house move to Paragon on the same programme.

SKILLS & CERTIFICATIONS

Skills: Project & Delivery Management, Requirements Analysis, Stakeholder Management, Agile & Waterfall, PMO Governance, Migration Delivery, Release & Deployment, Automation & AI-Assisted Delivery, Quadient Inspire (Designer, Interactive, Scaler, ICM), OpenText Xpression, JIRA, Confluence, ServiceNow, SQL/MySQL, RabbitMQ, Linux, Microsoft Excel, Power BI (Basic)

Certifications: Microsoft Azure Fundamentals (AZ-900); Power BI (Basic); Claude: AI Fluency for Small Businesses; Claude Code in Action; Claude 101; Quadient Inspire (Designer, Scaler, Interactive)

Languages: English (Fluent), Hindi (Conversational)
