PROFESSIONAL PROFILE

Technical project management professional and MBA candidate with nearly 4 years delivering technology projects for major UK insurance and utility clients. Skilled in planning and delivering projects end to end, managing senior stakeholders and coordinating cross-functional teams to deliver on time and to quality. Combines hands-on technical understanding of customer-communications and enterprise systems with strong communication, risk management and a focus on measurable outcomes. Targeting technical project management roles where structured delivery and collaboration drive results.

EDUCATION

MBA (Master of Business Administration) | Aston University | Birmingham, UK | Sep 2026 – Sep 2027 (Expected)

B.Tech, Electronics & Communication Engineering | India | 2024

PROFESSIONAL EXPERIENCE

Technical Project Manager – CCM Migration | Cognizant | India (UK/AU client – Chubb) *Jul 2025 – Present*

- To modernise a major UK insurer's customer communications, led the migration of legacy forms from Xpression to Quadient – converting them into reusable blocks and templates and deploying changesets across TEST/UAT/PROD – delivering with zero UAT defects and ~30% higher development efficiency, protecting ~70% of the account's project revenue.
- Built Business Templates (BT) and Style Masters to standardise document design, ensuring brand consistency across communications and reducing rework.
- Led a 15-member team across both Agile and Waterfall delivery – planning and tracking day-to-day work on JIRA and ServiceNow boards and reporting status to senior stakeholders – and trained all 15 on Quadient, building in-house capability and cutting reliance on external hiring by ~40%.
- Ran end-to-end resourcing and hiring across technology competencies, recruiting and onboarding 100–200 professionals in a year via SO-based placement to keep projects fully staffed and protect 60%+ of billable project revenue.
- Recognised with the Cognizant Cheers Award for delivery excellence and smooth deployment across environments.

Quadient Developer & PMO Analyst | Paragon Customer Communications (UK) | India *Feb 2025 – Jul 2025*

- To deliver CCM for 4 UK clients (Liberty, Scottish Power, Bupa, SSE), analysed business requirements and designed and developed templates in Interactive and Designer, generating multi-format outputs (PDF/JSON) and maintaining style masters for consistent, high-quality communications.
- Provided production support across environments – monitoring services and resolving failures – sustaining service levels and on-time delivery that helped retain 60%+ of programme revenue.
- Worked as PMO for PSAS India, owning governance, RAID logs, planning and status reporting to enable timely go/no-go decisions.

Quadient CCM Developer & Support Analyst | Atos Syntel | India (Client: Paragon, UK) *Sep 2022 – Feb 2025*

- To keep production communications running for Paragon Customer Communications (UK), analysed and debugged Quadient support tickets in JIRA using Scaler job IDs, monitored services across environments and resubmitted failed jobs from checkpoints after RabbitMQ/network failures – minimising downtime and sustaining SLAs.
- Patched and upgraded Quadient ICM and Designer on servers, keeping the platform stable, secure and current, working across Agile and Waterfall delivery using JIRA and ServiceNow boards.
- Coordinated controlled releases, moving 20–25 changesets per day across TEST-UAT and TEST-PROD and approving and assigning tasks – maintaining a zero-failed-deployment record with full audit compliance.
- Delivered consistently for Paragon Customer Communications (UK), earning a direct in-house move to Paragon to continue on the same programme.
